philcady@tacticalflying.com

BRIAN SPILLANE

Teledyne FLIR, Inc.
brian.spillane@teledyneflir.com

RYAN WELCH

Tactical Flying, Inc.
ryanwelch@tacticalflying.com

COURSE OBJECTIVES: This course is an in-depth study of airborne thermal imagery use in the areas of tactics, technology and theory. The course offers certification as an Airborne Thermographer to qualified students who attend all 24-hours of training, pass the written exam and demonstrate proficiency on the use of a static airborne thermal imagery system. The Airborne Thermographer Certification portion of the course is presented by Mr. Brian Spillane, Teledyne FLIR, who is a Certified Thermographer Instructor. The remainder of the course is presented by airborne thermal imagery experts, featuring Nick Minx of Tactical Flying, Inc, as the lead instructor. This course has been specifically designed for public safety aviation personnel for use in support of missions using airborne thermal imagery systems. The course is designed to benefit not only the TFO but the public safety pilot as well, as all of the instructors explain and demonstrate the theory, technology, tactics and legal issues involving the successful use of thermal imagery cameras and systems.

Maximum enrollment: 65

INTENDED AUDIENCE: This course is intended for public safety pilots; tactical fight officers and crewmembers assigned to public safety aviation units and meets all requirements for **Airborne Thermographer Certification**.
